Cleaning and Disinfection of
Medical Devices.

For over 30 Years

... neodisher® has been guide to the technical development of instrument hygiene and has set new standards.

neodisher® concepts guarantee first-class results and the longevity of high-quality materials.

Our specific expertise enables us to find solutions to even the most difficult challenges in areas where hygiene plays a crucial role. Put your trust in our expertise.

Expertise from a Single Source.

Reproducible and validated cleaning and disinfection processes are essential for maintaining a safe level of hygiene. Make the most of our expertise: the specialist knowledge of our neodisher® advisers is a strong argument for choosing Dr. Weigert. We are happy to advise you on all issues relating to cleaning and disinfecting medical devices and accessories.

Modern dosing and control systems enable you to record the throughput and monitor the flow of the process chemicals used. They also enable the remote transfer of data, to check that correct procedures are being followed, and batch documentation in the quality management system. Innovative process chemicals, precision dosing via the cutting-edge weigomatic® dosing systems and all the latest concepts offer exceptional safety and cost-effectiveness, and are environmentally friendly.

Service System for First-Class Results.

Our service system provides ongoing support so that you can continually achieve first-class results. We can quickly find answers to all your questions by drawing on our many decades of experience, exceptional expert knowledge and close partnership with the manufacturers of medical devices as well as of washer disinfectors. We are familiar with all washer disinfectors currently on the market. Dosing systems are maintained regularly. We help train your staff, creating the right environment for safe processes.

Your neodisher® specialist advisor is your contact for all questions – providing reliable and professional answers to issues relating to the safe reprocessing of medical devices.

Medical Devices and Accessories Pre-treatment

Correct Reprocessing

... begins with the professional pre-treatment of medical devices – preferably straight after use to prevent the cleaning process from being affected by dried-on residues.

Pre-treatment	neodisher® PreStop	neodisher® Septo PreClean	neodisher® Septo Plus	neodisher® Septo Active
cleaning	●	●	●	●
disinfecting		●	●	●*
Corrosion inhibitor	●			
pH-neutral			●	●
wet disposal	●	●		
compatible with aldehydes	●		●	●

* also suitable for the high-level disinfection of semi-critical medical devices

neodisher® PreStop

Corrosion inhibitor with self-acting pre-cleaning already in the OR – spray foam –

Corrosion inhibitor for spraying onto surgical instruments in operating theatres directly after use. Prevents pitting corrosion on stainless steel instruments that can be caused by residues of blood or saline solution. Facilitates subsequent cleaning. Suitable for surgical instruments incl. MIS instruments.

Bottles 12 x 0.75 L 4086 47

neodisher® Septo PreClean

**Detergent and disinfectant – liquid concentrate –
Based on amines – bactericidal, yeasticidal, active against enveloped viruses (1.0 %, 15 min, 20 °C)**

For the manual cleaning and disinfection prior to automated reprocessing as well as for wet disposal over longer periods of time, e.g. over night or over the weekend. Excellent cleaning performance and excellent material compatibility; no protein fixation. Free of aldehydes and quaternary ammonium compounds. VAH¹ listed and included in the IHO² list of disinfectants.

Drum	190 kg	4503 13	Bottles	12 x 1 L	4503 44
Canister	5 L	4503 35			

neodisher® Septo Plus

**Detergent and disinfectant – liquid concentrate –
Based on quaternary ammonium compounds – bactericidal, yeasticidal, active against enveloped viruses (1.0 %, 15 min, 20 °C)**

For the manual cleaning and disinfection as well as for the disinfecting pre-cleaning in immersion baths or ultrasonic baths prior to automated reprocessing. Excellent cleaning performance, no protein fixation. Excellent material compatibility. Free of aldehydes and amines. Compatible with disinfectants containing aldehydes and peracetic acid. VAH¹ listed, included in the IHO² list of disinfectants.

Canister	5 L	4209 35	Bottles	12 x 1 L	4209 44
----------	-----	---------	---------	----------	---------

neodisher® Septo Active

**Detergent and disinfectant – granulate –
Based on peracetic acid - bactericidal, yeasticidal, active against enveloped viruses (1.0 %, 5 min, 20 °C)
sporocidal against C. difficile (1.0 %, 15 min, 20 °C)**

For the disinfecting pre-cleaning in immersion baths or ultrasonic baths prior to automated reprocessing. pH-neutral. Good cleaning performance, no protein fixation. Excellent material compatibility. Pleasant odour. Free of aldehydes and quaternary ammonium compounds. VAH¹ listed, included in the IHO² list of disinfectants, ÖGHMP³ listed.

Bucket	8 kg	4098 76	Sachets	25 x 100 g	4098 79
Bucket	4 x 2 kg	4098 81			

With the aid of the neodisher® test strips (art. no. 981320) the concentration of the working solution can be determined.

The Ideal Concept

... for all materials and all types of contamination! The individually selectable programs and detergents guarantee perfect, residue-free cleaning and reliable results.

neodisher® MediClean advanced

**Mildly alkaline universal detergent – highly concentrated liquid –
Contains alkalinity donors, enzymes and surfactants**

High concentration with particularly strong cleaning performance so that only a small amount of product needs to be used. Gives brilliance to the instruments. Removes dull deposits ensuring that instruments maintain an optimum look and feel over the long term. Sustainable, as it conserves resources. Excellent material compatibility and thus preserves materials.

Drum	220 kg	4130 13	Canister*	5 L	4130 33

Medical Devices and Accessories Automated Cleaning

Our Recommendations

... for the automated reprocessing of surgical, minimally invasive and microsurgical instruments, rigid endoscopes, implants, sterilisation containers, anaesthetic, inhalation and intensive-care equipment, surgical shoes and baby bottles

Cleaning	neodisher® DuoClean	neodisher® MediClean	neodisher® MediZym	neodisher® FA	neodisher® Alka 300	neodisher® MA
mildly alkaline/alkaline	●	●		●	●	●
with surfactants	●	●	●			●
enzymatic		●	●			
with active chlorine					●	
liquid		●	●	●	●	

neodisher® DuoClean

Highly alkaline intensive detergent – liquid concentrate – Free of phosphates, silicates and oxidising agents

For the automated intensive cleaning of surgical instruments made of stainless steel and other alkali-compatible surfaces. Excellent cleaning performance; removes blood, protein, stubborn surgical residues and also other highly adhesive soiling.

Drum	240 kg	4030 13	Canister	5 L	4030 33
Canister	10 L	4030 30			

neodisher® MediClean

Mildly alkaline, enzymatic detergent – liquid concentrate –

Excellent cleaning performance with perfect material compatibility which is usually only achieved with pH-neutral products.

Drum	220 kg	4043 13	Canister	10 L	4043 30
Canister	20 L	4043 26	Canister	5 L	4043 33

neodisher® MediZym

pH-neutral, enzymatic detergent – liquid concentrate –

Material compatible cleaning with enzymes and supporting components. Removes residues of dried and denatured blood.

IBC container	600 kg	4040 09	Canister	10 L	4040 30
Drum	200 kg	4040 13	Canister	5 L	4040 33

neodisher® FA

Alkaline detergent – liquid concentrate – Free of surfactants and oxidative additives

Excellent cleaning performance and material compatibility.

Drum	270 kg	4101 13	Canister	10 L	4101 30
Canister	25 kg	4101 26	Canister	5 L	4101 33

Medical Devices and Accessories Automated Cleaning

neodisher® Alka 300

Alkaline detergent – liquid concentrate – Contains active chlorine

Intensive cleaning performance with oxidative decomposition action for stubborn organic residues. Also suitable for use with the Dr. Weigert fleece wipe dispensing system neoform® wipes RTF.

Drum	270 kg	3103 13	Canister	12 kg	3103 30
Canister	25 kg	3103 26			

neodisher® MA

Alkaline detergent – powder – Free of oxidative additives

Excellent cleaning performance and material compatibility.

Bucket	10 kg	4107 76	Bottles	12 x 1 kg	4107 87
--------	-------	---------	---------	-----------	---------

neodisher® OXIVARIO

Cleaning enhancer – liquid concentrate – Based on active oxygen

Cleaning enhancer with oxidative action for removing stubborn coagulated protein and tissue residues, especially developed for the Miele OXIVARIO and OXIVARIO PLUS process.

Canister	5 L	4004 33
----------	-----	---------

neodisher® SystemAct

component for
neodisher
system
ALPHA

Enzymatic cleaning component – highly concentrated liquid –

Enzymatic cleaning component which is used together with the mildly alkaline cleaning component neodisher® SystemClean. First-class cleaning performance due to the individually adaptable combination of alkali and enzyme component. Excellent material compatibility, excellent compatibility with anodized aluminium. Dosing via the weigomatic® system ALPHA component dosing system.

Canister with RFID ⁴	2 x 5 L	4023 37
---------------------------------	---------	---------

neodisher® SystemClean

component for
neodisher

Medical Devices and Accessories Automated Disinfection

Our Recommendations

... for the chemo-thermal disinfection of surgical, minimally invasive and microsurgical instruments, rigid endoscopes, implants, sterilisation containers, anaesthetic, inhalation and intensive-care equipment and surgical shoes

Disinfection	neodisher® SeptoClean	neodisher® Septo DN
bactericidal	●	●
tuberculocidal		●
mycobactericidal		●
yeastcidal	●	●
fungicidal		●
virucidal	●	●
prion inactivating	●	

neodisher® SeptoClean

Alkaline detergent with disinfecting action – liquid concentrate – Bactericidal, yeastcidal, virucidal, prion inactivating

The 2 step neodisher SeptoClean process with only one process chemical guarantees perfect cleanness and hygienic safety. Prion inactivating and prion decontaminating*. Broad microbicidal activity spectrum and good material compatibility; especially suitable for the facilitated reprocessing of thermolabile medical devices. Included in the IHO² list of disinfectants.

Drum	270 kg	4025 13	Canister	25 kg	4025 26
Drum with RFID ⁴	270 kg	4025 14	Canister	5 L	4025 33

neodisher® Septo DN

Disinfectant – liquid concentrate – Bactericidal, mycobactericidal, fungicidal, virucidal

Very low odour due to a special active substance combination. Lower inhalation risk than with market-standard disinfectants with a higher amount of glutardialdehyde. Included in the IHO² list of disinfectants.

Drum	200 kg	4010 13	Canister	10 L	4010 30
Canister	20 L	4010 26	Canister	5 L	4010 33

Medical Devices and Accessories Neutralisation

Our Recommendations

... for the neutralisation of alkaline residues in the automated cleaning of surgical instruments, anaesthetic equipment, containers, baby bottles, surgical shoes and other medical utensils

Neutralisation	neodisher® N	neodisher® Z	neodisher® SystemSpecial
acidic	●	●	●
free of surfactants	●	●	●
free of phosphates		●	●
for sensitive materials		●	●

neodisher® N

Acidic neutralising agent – liquid concentrate – Based on phosphoric acid. Free of surfactants

For neutralising carried over alkali residues and removing lime residues or other acid-soluble residues during automated reprocessing.

IBC container	1,000 kg	4201 03	Canister	12 kg	4201 30
Drum	290 kg	4201 13	Canister	5 L	4201 33
Canister	25 kg	4201 26	Bottles	12 x 1 L	4201 87

neodisher® Z

Acidic neutralising agent – liquid concentrate – Based on organic acids. Free of surfactants and phosphates

For neutralising carried over alkali residues during automated reprocessing.

Drum	240 kg	4202 13	Canister	5 L	4202 33
Canister	20 L	4202 26	Bottles	12 x 1 L	4202 87
Canister	10 L	4202 30			

neodisher® SystemSpecial

Acidic detergent and neutralisation component – liquid concentrate –

Acidic component for the automated reprocessing of surgical instruments incl. MIS instruments and micro instruments, anaesthesia utensils, containers and other medical utensils. Prevents the formation of mineral deposits caused by e.g. suboptimal water qualities. Neutralises alkaline residues from the main cleaning step during automated reprocessing, e.g. with ophthalmological instruments. Dosing via the weigomatic® system ALPHA component dosing system.

Canister with RFID ⁴	2 x 5 L	4214 37

suitable for PSU, PPSU			●	

neodisher® MediKlar

Rinse aid – liquid concentrate –

For rapid and stain-free drying during automated reprocessing of surgical instruments, incl. ophthalmological instruments, anaesthesia utensils, sterilisation containers, flexible endoscopes and implants as well as baby bottles. Significantly shortens the drying time.

Drum	200 kg	4045 13	Canister	10 L	4045 30
Drum with RFID ⁴	200 kg	4045 14	Canister	5 L	4045 33
Canister	20 L	4045 26			

neodisher® MediKlar special

Rinse aid – liquid concentrate –

For rapid and stain-free drying during automated reprocessing of surgical instruments, incl. ophthalmological instruments, anaesthesia utensils, sterilisation containers, implants as well as baby bottles. Neutralises carried over alkali residues and reduces the formation of stains when using softened water in the final rinse cycle.

Drum	200 kg	4073 13	Canister	5 L	4073 33
Drum with RFID ⁴	200 kg	4073 14	Bottles	12 x 1 L	4073 49
Canister	20 kg	4073 26			

neodisher® MediDry special

Rinse aid – liquid concentrate –

Especially for the rinsing of medical devices made of plastic materials, particularly for accessories of anaesthesia utensils made of polysulfone (PSU) and polyphenylsulfone (PPSU) such as connectors of laryngeal masks, adaptors and container lids. Also suitable for other medical devices such as surgical instruments. Supports the drying, neutralises alkaline residues and reduces the formation of stains when using softened water in the final rinse cycle.

Canister	10 L	4571 30
----------	------	---------

neodisher® SystemRinse

Rinse aid – liquid concentrate –

For the fast and streak-free drying during automated reprocessing of surgical instruments including MIS instruments and micro instruments, anaesthesia utensils, containers and other medical utensils. Reduces the drying time considerably. Dosing via the weigomatic® system ALPHA component dosing system, especially developed for dosing highly concentrated liquids.

Canister with RFID ⁴	2 x 5 L	4126 37

Medical Devices and Accessories Care and Thorough Cleaning

neodisher® IP Konz

Lubricant for surgical instruments – liquid concentrate – Based on emulsifiers and highly purified white oil

For dosing into the final rinse water during automated reprocessing. Steam sterilisation is not inhibited. Toxicologically harmless.

Canister	5 L	4306 33
----------	-----	---------

neodisher® IP Spray

Lubricant for surgical instruments – spray – Based on highly purified white oil

For the manual lubrication of hinged instruments after automated reprocessing. Does not lead to encrustations, does not influence a following steam or hot air sterilisation. Toxicologically harmless.

Spray can	12 x 400 ml	4304 90
-----------	-------------	---------

neodisher® IR

Acidic detergent for thorough cleaning – liquid concentrate –

For the thorough cleaning of surgical instruments made of stainless steel in immersion baths and ultrasonic baths. Tarnish, rust film and extraneous rust are removed. Observe product data sheet before use.

Canister	8,7 L	4204 30	Bottles	12 x 1 L	4204 49
----------	-------	---------	---------	----------	---------

Automated Reprocessing

... is preferable to manual reprocessing because it takes place within a closed system, is standardised and can be validated. Other advantages include exceptionally high safety, improved efficiency and the protection of personnel and materials.

neodisher endo® CLEAN

Mildly alkaline detergent for the automated and manual reprocessing of flexible endoscopes – liquid concentrate – Based on alkalinity donors, enzymes and surfactants

For cleaning flexible endoscopes and endoscopic accessories in washer disinfectors for flexible endoscopes (WD-E). Excellent cleaning performance. Fulfils the current recommendations of the Robert Koch-Institute (RKI) for the reprocessing of medical devices to minimise the risk of transmitting the new variant of the Creutzfeldt-Jakob Disease (vCJD). Effective at low temperatures. Low-foam formulation - no inhibition of cleaning activity due to foaming. Excellent material compatibility; suitable for endoscopes of all leading manufacturers.

When also using neodisher endo® CLEAN for manual pre-cleaning the cleaner solution does not need to be rinsed off prior to automated reprocessing.

Flexible Endoscopes Automated Disinfection

Flexible Endoscopes

... should be reprocessed using at least bactericidal, mycobactericidal, fungicidal and virucidal disinfectants. Aldehydic products are ideal for disinfection due to their high, broad-level efficacy and good material compatibility. Disinfectants containing peracetic acid also offer wide-ranging microbiocidal efficacy, fast action and environmentally friendly degradation products.

neodisher endo® SEPT GA

Disinfectant for the automated reprocessing of flexible endoscopes – liquid concentrate – Based on glutaraldehyde - bactericidal, mycobactericidal, fungicidal, virucidal (1 %, 55 °C, 5 min), in the process with neodisher endo® CLEAN also active against spores (incl. C. difficile)

For the disinfection of flexible endoscopes in washer disinfectors for flexible endoscopes (WD-E). Particularly user-friendly due to its low-odour formulation. Excellent material compatibility; suitable for endoscopes of all leading manufacturers. Free of formaldehyde and quaternary ammonium compounds. Included in the IHO² list of disinfectants. The products **neodisher endo® CLEAN** and **neodisher endo® SEPT GA** are perfectly matched: A possible carrying over of neodisher endo® CLEAN solution into the disinfection cycle has no negative impact on the disinfection performance of neodisher endo® SEPT GA. The automated reprocessing process with neodisher endo® CLEAN and neodisher endo® SEPT GA fulfills the requirements of DIN EN ISO 15883-4 in regard to a total germ reduction of > 9 log 10 in the entire process.

neodisher endo® SEPT PAC

Disinfectant for the automated reprocessing of flexible endoscopes – liquid concentrate – Based on peracetic acid - bactericidal, mycobactericidal, fungicidal, virucidal, sporicidal against C. difficile (1 %, 35 °C, 5 min)

For the disinfection of flexible endoscopes in washer disinfectors for flexible endoscopes (WD-E). Rapid and extensive activity incl. sporicidal activity at 25 °C and at 35 °C. No activator necessary, only one component. Suitable for endoscopes of all leading manufacturers. Material compatibility confirmed in several million cycles. Free of aldehydes and quaternary ammonium compounds. Included in the IHO² list of disinfectants. The products **neodisher endo® CLEAN** and **neodisher endo® SEPT PAC** are perfectly matched: A possible carrying over of neodisher endo® CLEAN solution into the disinfection cycle has no negative impact on the disinfection performance of neodisher endo® SEPT PAC. The automated reprocessing process with neodisher endo® CLEAN and neodisher endo® SEPT PAC fulfills the requirements of DIN EN ISO 15883-4 in regard to a total germ reduction of > 9 log 10 in the entire process.

Flexible Endoscopes Manual Disinfection

neodisher endo® DIS active

Cleaning and disinfecting agent for the manual reprocessing of flexible endoscopes – granulate – Based on peracetic acid - bactericidal, mycobactericidal, fungicidal, virucidal, sporicidal against C. difficile (2.0 %, 15 min, 20 °C), sporicidal (2.0 %, 60 min, 20 °C)

For the manual disinfection of flexible endoscopes and endoscopic accessories. Excellent material compatibility; suitable for endoscopes of all leading manufacturers. Pleasant odour (free of perfumes), pH-neutral. Free of aldehydes and quaternary ammonium compounds. VAH¹ listed, included in the IHO² list of disinfectants, ÖGHMP³ listed.

Bucket	8 kg	4077 76	Sachets	25 x 100 g	4077 79
Bucket	4 x 2 kg	4077 81			

With the aid of the neodisher® test strips (art. no. 981320) the concentration of the working solution can be determined.

Reprocessing of Bedpans and Urine Bottles

Complexing Agents

... prevent lime deposits in steam generators, pipes and jets which would lead to longer heating times, higher energy consumption, over-heating and irreparable damage to the heating coils.

Overview	neodisher® SBR extra	neodisher® SBN plus	neodisher® SBK	neodisher® SBX
cleaning	●			
complexing		●	●	●

defoaming			●	●
all degrees of water hardness	●	●	●	●

neodisher® SBR extra

Detergent – liquid concentrate –

Removes even stubborn stains, such as saponified lime residues and residues from cytostatic agents originating from human excrements. Suitable for bedpan washer disinfectors equipped with a corresponding dosing pump.

Canister	5 L	4007 33
----------	-----	---------

neodisher® SBN plus

Combined complexing agent and rinse aid – liquid concentrate – Based on organic acids and surfactants

Effectively prevents lime deposits in steam generators, pipes and jets even at high degrees of water hardness. For optimised, rapid and stain-free drying. Suitable for acid-compatible bedpan washer disinfectors. Pleasant fresh odour.

Canister	5 L	4792 35
----------	-----	---------

neodisher® SBK

Combined complexing agent and rinse aid – liquid concentrate – Based on organic acids

Effectively prevents lime deposits in steam generators, pipes and jets even at high degrees of water hardness. Supports rapid and stain-free drying. Reduces foaming. Suitable for acid-compatible bedpan washer disinfectors.

Drum	200 kg	4006 13	Canister	5 L	4006 35
------	--------	---------	----------	-----	---------

neodisher® SBX

Complexing agent – liquid concentrate –

For preventing lime deposits in steam generators. Suitable for all bedpan washer disinfectors.

Canister	5 L	4015 35
----------	-----	---------

Reprocessing of Bed Frames and Surgical Tables

neodisher® Dekonta AF*

Combined detergent and disinfectant – liquid concentrate – Free of aldehydes – bactericidal, yeasticidal, active against enveloped viruses

For the automated reprocessing of bed frames, sterilisation containers and surgical tables as well as trolleys and surgical shoes in decontamination systems. Rapid action and good material compatibility. Included in the IHO² list of disinfectants. For the combined automated cleaning and disinfection of personal protective equipment (PPE).

IBC container	590 kg	4018 09	Drum with RFID ⁴	200 kg	4018 14
Drum	200 kg	4018 13	Canister	20 L	4018 26

neodisher® TN

Rinse aid – liquid concentrate –

For improved drying of difficult-to-wet materials, such as e.g. synthetic materials during automated reprocessing of bed frames and trolleys in decontamination systems, pH-neutral.

Drum	200 kg	3115 13	Canister	20 kg	3115 26
------	--------	---------	----------	-------	---------

neodisher® MediKlar special

Rinse aid – liquid concentrate –

For rapid and stain-free drying during automated reprocessing of sterilisation containers and bed frames. Neutralises carried over alkali residues and reduces the formation of stains when using softened water in the final rinse cycle.

Drum	200 kg	4073 13	Canister	5 L	4073 33
Drum with RFID ⁴	200 kg	4073 14	Bottles	12 x 1 L	4073 49

* Use disinfectants safely. Always read the label and product information before use.

Surface Cleaning and Surface Disinfection

neoform® Classic*

Disinfecting cleaner – liquid concentrate – Bactericidal, yeasticidal, tuberculocidal, limited spectrum virucidal activity, active against enveloped viruses

For the daily combined cleaning and disinfection via wiping of surfaces of medical devices, medical equipment and other surfaces in hospitals, doctors' practices, old people's homes, laboratories and public institutions. Good cleaning performance, excellent material compatibility, streak-free disinfecting cleaning of surfaces, wide activity spectrum, even at short contact times. VAH¹-listed, on the IHO² list of disinfectants. Also suitable for use with the Dr. Weigert fleece wipe dispensing system neoform® wipes RTF.

Canister	5 L	4470 35	Bottles	6 x 2 L	4470 42
----------	-----	---------	---------	---------	---------

neoform® MED FF*

Disinfecting cleaner – liquid concentrate – Bactericidal, tuberculocidal, yeasticidal, virucidal, sporicidal against C. difficile

For cleaning and disinfecting medical devices and medical inventory. Application via wiping method. VAH¹ listed and included in the IHO² list of disinfectants. Also suitable for use with the Dr. Weigert fleece wipe dispensing system neoform® wipes RTF.

Canister	5 L	4057 35
----------	-----	---------

neoform® Active*

Disinfecting cleaner – granulate – Based on peracetic acid – bactericidal, mycobactericidal, fungicidal, virucidal, sporicidal

For disinfecting surfaces of medical devices, surfaces in old people's homes as well as surfaces in the laboratory area. Wide activity spectrum, even with short contact times. Good cleaning performance, no protein fixation, excellent material compatibility. Coated granulate – low dust, easily soluble. VAH¹ listed and included in the IHO² list of disinfectants.

Bucket	4 x 2 kg	4471 81	Sachets	40 x 50 g	4471 75
--------	----------	---------	---------	-----------	---------

With the aid of the neodisher® test strips (art. no. 981320) the concentration of the working solution can be determined.

neoform® Rapid*

Rapid disinfectant – ready-to-use solution – Bactericidal, yeasticidal, fungicidal, tuberculocidal, limited spectrum virucidal activity, active against enveloped viruses

Alcohol-based solution for disinfecting surfaces of medical devices, surfaces in the laboratory area as well as surfaces and equipment in the pharmaceutical and cosmetics area. Application: wiping method. VAH¹ listed and included in the IHO² list of disinfectants. Also suitable for use with the Dr. Weigert fleece wipe dispensing system neoform® wipes RTF.

Bottles	12 x 0.75 L	5643 47
---------	-------------	---------

neoform® wipes RTF

Disposable fleece wipe dispensing system for use with surface disinfectants

Disinfecting cleaning and disinfection of surfaces, appliances, medical devices and medical equipment in combination with suitable Dr. Weigert surface disinfectants in hospitals, old people's homes/nursing homes, in chemical and pharmaceutical areas, laboratories as well as in food processing companies and professional kitchens. Also suitable for high-risk areas such as neonatology or haematological oncology in accordance with the VAH¹ recommendation³. Multi-purpose, compatible with a broad range of Dr. Weigert surface disinfectants, proved using the 4-fields-test (EN 16615).

Dispenser with fleece wipe roll	8 Units	4213 95

Hand Hygiene

triformin® wash

Washing lotion

For hand and body washing. Excellent skin tolerance, confirmed by dermatological certificates. Especially suitable for normal, dry and sensitive skin. Based on natural plant-based raw materials, with aloe vera and natural bee honey. Free of soap and alkali. Dosing via triformin® dispenser 1.0 and triformin® dispenser 0.5.

Canister	5 L	3173 35	Bottles	20 x 500 ml	3173 63
Bottles	10 x 1 L	3173 48			

triformin® wash pure

Washing lotion

For hand and body washing. Excellent skin tolerance, confirmed by dermatological certificates. Especially suitable for normal and dry skin. Free of perfume and colouring agents. With lipid replenishing components and moisturising glycerin. Free of soaps and alkali. Dosing via triformin® dispenser 1.0 and triformin® dispenser 0.5.

Canister	5 L	3183 35	Bottles	20 x 500 ml	3183 63
Bottles	10 x 1 L	3183 48			

weigoman® pure*

Hand disinfectant – ready-to-use solution –

Bactericidal, yeasticidal, tuberculocidal, virucidal activity against enveloped viruses, active against Norovirus

Perfume-free alcohol-based rub-in disinfectant for hand disinfection. Excellent skin tolerance, with highly active moisturisers. Suitable for sensitive skin. Included in the IHO² list of disinfectants. Dosing via triformin® dispenser 1.0 and triformin® dispenser 0.5.

Bottles	10 x 1 L	4078 48	Bottles	50 x 100 ml	4078 65
Bottles	20 x 500 ml	4078 63			

triformin® care

Skin care cream

For skin care after work and during breaks. Excellent skin tolerance, confirmed in dermatological certificates. Free of perfumes. Dosing of 500 ml bottle via triformin® dispenser 0.5.

Bottles	6 x 500 ml	3105 39	Tubes	12 x 100 ml	3105 15
---------	------------	---------	-------	-------------	---------

triformin® protect

Skin protection cream

Protects the skin from drying out. Long-lasting protection and intensive care. Excellent skin tolerance, confirmed by dermatological certificates. Free of perfumes. Dosing of 500 ml bottles via triformin® dispenser 0.5.

Bottles	6 x 500 ml	3102 39	Tubes	12 x 100 ml	3102 15

Dosing Solutions

Intelligent Dosing – Process Safety – Data Management:

Modern dosing systems with data capture for automatically supplying washer disinfectors are a prerequisite for safe process management, validation and permanently optimal cleaning results in instrument reprocessing.

Our specialists design, create, install and maintain all systems – from the simplest dosing station to central systems for several washer disinfectors and the highest requirements with data capture and data management. Our aim: highest quality, functionality and an exceptionally professional approach. Plan your new systems and redesign existing ones with us, right from the start!

Central Dosing Units

Central dosing units supply multiple washer disinfectors (WD) with liquid process chemicals in larger washing units. The installation of the systems can take place irrespective of the location of the washer disinfectant. The use of large containers makes application not only more economical, but also very user-friendly with regard to industrial safety. Awkward handling of canisters is eliminated and dosing takes place in closed systems! The modular **weigomatic®** principle combines individual solutions with an exceptional degree of flexibility and a wide range of retrofitting options. We will design the optimal dosing unit to suit your needs!

weigomatic® data management integrates important quality aspects into the cleaning and disinfection process. All relevant data such as periods of operation and amounts of process chemicals used can be continually recorded and documented via the data storage unit. This data can then be clearly displayed on a computer or the touch panel, can be viewed and evaluated from the desktop, and analysed or assessed locally or on the Internet. This guarantees the highest degree of efficiency and early error and fault detection – a must for all validated processes and for optimised process reliability.

weigomatic® DOS Manager

weigomatic® DOS manager is a combined dispensing and monitoring system for managing the dosage of liquid process chemicals via **weigomatic®** buffer tanks in washer disinfectors. The integrated memory unit permits the continuous collection of specific operational data, such as quantities used and periods of operation – which can be clearly evaluated and documented on a computer. Early fault detection ensures cost-effective operation and excellent process reliability.

weigomatic® identSYSTEM

The system enables automatic touchless product identification which prevents mix-ups. Therefore, the system not only ensures intuitive handling when changing product containers but first and foremost guarantees an absolutely reliable start of a successful cleaning and disinfection process. The operating principle is ingeniously simple and is based on the consistent use of RFID technology (Radio Frequency Identification). Containers fitted with **weigomatic®** RFID transponder are individually coded. The transmitted signal is read by a receiver fitted on the dosing station. This ensures that the correct process chemical is used. The automatic dosing of process chemicals is activated and all quality-relevant data and parameters which are important for the cleaning process are recorded, such as e.g. time and cycle of the container exchange as well as batch number and use-by-date of the process chemical.

Dosing Solutions

weigomatic® system ALPHA X

Component dosing system specially developed for dosing high concentrates for an optimised automated reprocessing.

The new generation **weigomatic® system ALPHA X** can be used in several expansion variants in the CSSD as well as in endoscopies and doctor's surgeries for endoscopy. Up to four washer disinfectors for endoscopes (WD-E) can be supplied with max. 3 process chemicals.

Dosing is carried out via **weigomatic®** buffer tanks which ensure a continuous supply to the WD-E and allow complete residual emptying of the product containers.

RFID technology guarantees a controlled and safe exchange of canisters without the risk of mix-ups.

Meets the requirements and test procedures for WD-E with chemical disinfection according to DIN EN ISO 15883-4.

Compliance with the standard prevents incorrect loading and incorrect reprocessing of the endoscopes.

neomatik® mediDOS

The microprocessor-controlled dosing device serves to produce ready-to-use detergent and disinfectant solutions from liquid concentrates for manual application. The mixing device with a robust stainless steel casing for wall mounting can be easily operated and features an automatic switch-off in the case of product depletion as well as fill level monitoring.

neomatik® mediDOS complies with the RKI recommendations for decentralised disinfectant dosing devices.*

For more information, please visit www.drweigert.com

Dosing and Controlling Systems – Reliable and High-Performance:

The precise dosing of process chemicals and recording of important process data are all essential for process validation. Dr. Weigert has been leading the way in the development of professional system solutions for decades. Based on this experience, we offer tailored concepts and solutions that guarantee the highest safety, cost-effectiveness and simplest handling.

Those responsible for hygiene know how important it is to be able to rely on concepts that ensure long-term continuous safety. Dosing and controlling technology from Dr. Weigert continues to evolve on the basis of the latest requirements and decades of experience.

Systematic Service

Ongoing Support

Support is one of our most important tasks: we make it our aim to impress with our performance and to find tailored solutions to individual requirements. Our systematic service provides ongoing support so that you can continually achieve first-class results. Dosing systems are maintained regularly and we conduct microbiological tests to monitor and document adherence to hygiene regulations. We also help train your staff, creating the right environment for safe processes.

Safe Hygiene is Our Top Priority!

People working in the reprocessing of medical devices are aware of its high requirements in terms of process quality and the quality of results. Put your trust in our experience and service!

Cleaning and disinfection processes have to be able to achieve reproducible results at the highest level, using validated and traceable procedures. Make the most of Dr. Weigert's expertise for hygiene processes that achieve the ideal balance between efficiency, safety and cost-effectiveness.

Reprocessing of instruments begins with the proper disposal of the instruments in suitable containers in the operating theatre and the proper loading of the washer disinfectant. It ends with sterilisation and documented approval of the medical device for further use. If material changes occur, the entire instrument cycle must be checked. After automated cleaning and disinfection, this reveals any surface changes to reprocessed medical devices such as surgical instruments that may have occurred during steam sterilisation or disposal in the operating theatre.

We determine the causes for material changes and conduct systematic tests in addition to microscopic surface analyses. Analyses of the various process waters, steam condensate, boiler feeds and boiler water as well as the sterilisation packs provide important information. We use this data to give practical recommendations so that you can avoid recurring discolouration, etc. – for continual first-class results.

neodisher® – Perfect Solutions.

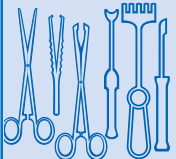

In terms of the development of products and processes, neodisher® is always one step ahead. A close partnership with the manufacturers of instruments and other medical devices is the basis for developing innovative process chemicals and devising new processes. Tailored solutions for practical applications – for increased safety and preservation of value!
