

Alkaline cleaning agent for the food industry

Liquid concentrate

Fields of application:

- Single-phase cleaning of production systems, containers, tanks, lines, boilers and separators using automated CIP processes or circulation processes in the food industry.

Performance spectrum:

- Reliably removes organic soiling
- Very strong complexing action and therefore effective softening of water for optimum single-phase cleaning of production systems
- Foam-free adjustment
- Suitable for stainless steel and alkali-resistant plastics and seals
- Not suitable for aluminium and light alloys, copper, brass and non-ferrous alloys as well as tinned and galvanised surfaces

Application and dosage:

- Single-phase cleaning of production systems, containers, tanks, lines, boilers and separators using automated CIP processes and in circulation processes: The application concentration is 2.0 – 3.0 % (w/w) depending on the application, water hardness and degree of soiling, at temperatures of 40 – 80 °C

General notes on application:

- For professional use only.
- In order to avoid product residues, rinse all surfaces with drinking water, especially those that come in contact with food, after each cleaning and disinfection measure.
- Do not mix with other products.
- Rinse out dosing system including suction hoses with water before changing product.
- Dose only from the original container.
- Do not use as a concentrate – only as a working solution.

- Please observe the operating instructions given by the manufacturer of the system/device.
- The weigomatic dosing systems and neomatik dosing devices by Dr. Weigert enable controlled, safe and economical application. We are a specialist company in accordance with the German Water Act (WHG). Suited to the individual conditions and requirements, we plan, install and maintain central and distributed dosing systems.

Determining concentration:

After adding one to two drops of phenolphthalein solution, 10 ml of neomoscan FA 25 solution is titrated with 0.1 N hydrochloric acid until the colour changes from red to colourless.

ml of 0.1 N HCl used x 0.17 = % (w/w) neomoscan FA 25

Technical data:

Appearance	Clear, yellow liquid
pH value	12.7 (1% in fully deionised water, 20 °C)
Density	Approx. 1.4 g/cm ³ (20 °C)
p-value	Approx. 23 (ml of 0.1 N HCl used in titration of 400 mg concentrate against phenolphthalein)

The product specification may contain deviating test parameters. This specification can be obtained on request.

Ingredients:

Ingredients for cleaning agents according to Regulation (EC) No. 648/2004 on detergents:
< 5% EDTA,
5–15% phosphonates

Storage information:

Always store at a temperature between 0 and 30 °C. Usable for 3 years when stored as recommended. For the expiry date, refer to the stamp mark on the label behind the hourglass symbol .

Changes in the colour of the product may occur when storing in factory-sealed trade units. This has no impact on the properties of the product which are relevant for application.

Hazard and precautionary statements:

For safety information, see Safety Data Sheets. These are available at www.drweigert.com under the category "Service/Downloads".

If applied according to the instructions for use, the product is safe according to the applicable guidelines for food processing.

Dispose only when the container is empty and closed. For disposal of product residues, refer to the Safety Data Sheet.

DS 1214/3-1
